

PLACING AR OBJECT USING THE XR-MASTERS APP

You should be at a location that was previously digitally mapped/scanned successfully.

1. Download the “XR Masters App” from Apple App Store or Google Playstore
2. Launch the XR Masters Spatial Browser App

3. Sign in with your username and password. If you don't have an account please Register.
Note: In order to be able to place content, your user type needs to be updated to "Editor".
Please send an e-mail to developer@xr-masters.com and request to be an "Editor".

4. The camera of your device will be launched. Please make sure you are at a previously scanned location and tap on “Start AR”

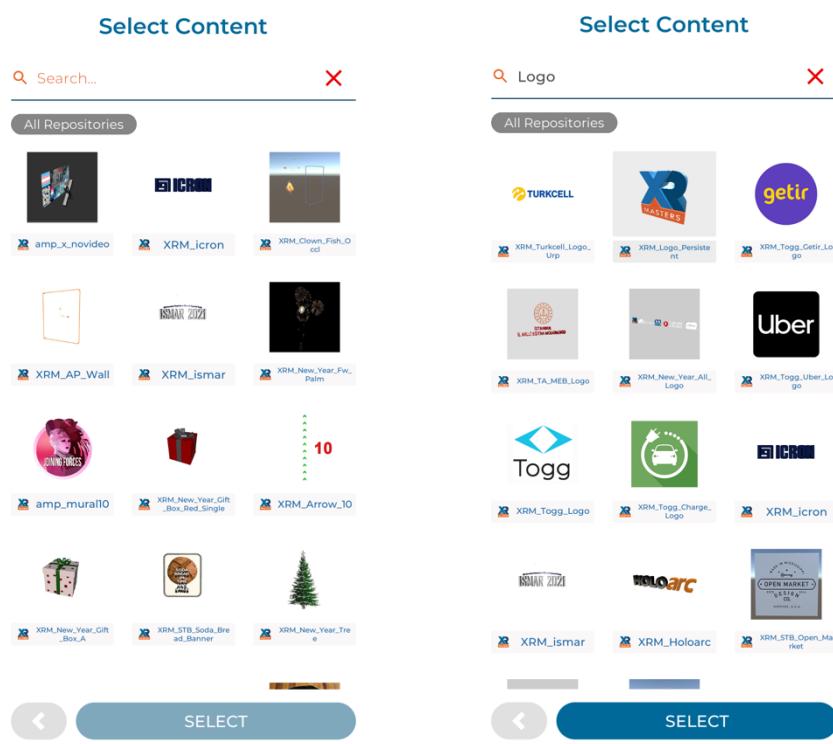

5. Please hold still during the localization process

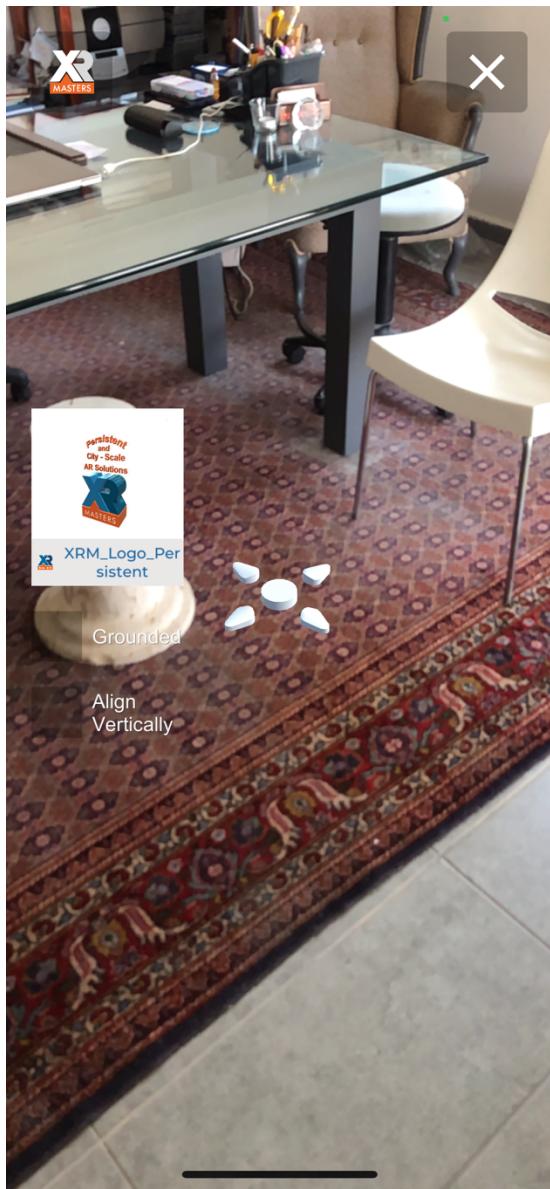

6. Open the menu on the top right corner and tap on “Place Content”

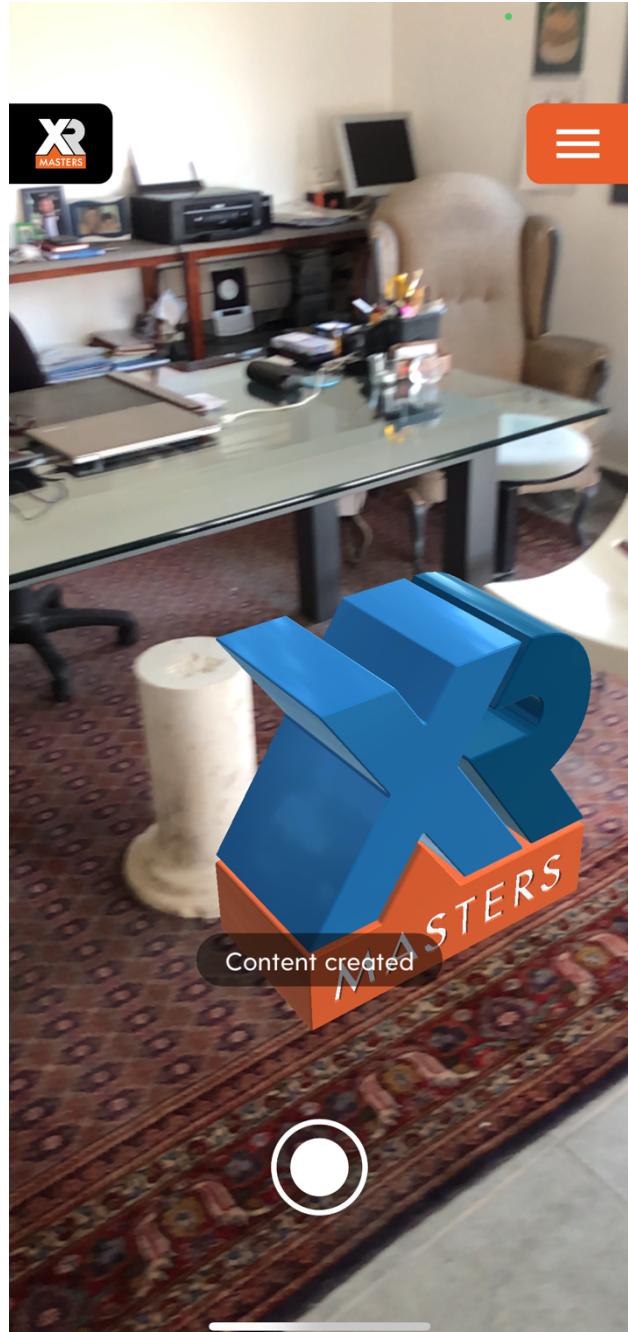

7. Please select the AR content of your choice. You can scroll among the models or search by name

8. Point your phone toward a horizontal surface. Move and tap screen to place content when indicator turns white.

9. Adjust your model if necessary, using the menu that is placed at the bottom of the screen. (You can relocate, resize, rotate and adjust height) When you are ready, tap on "Place"

You are all set!
